SUMMARY

Computer Science Engineering student with hands-on experience building scalable applications using React.js, Node.js, Express.js, JavaScript, Python, Java, and SQL. Skilled in frontend development, backend API design, database management, authentication systems, and cloud fundamentals. Strong understanding of software engineering principles, object-oriented programming, data structures, algorithms, and SDLC. Seeking a Software Developer / Full Stack Developer role to build high-performance and scalable applications.

PROJECTS

AI-Powered Career Guidance System Python · Flask · React.js · Machine Learning · SQL · REST APIs

- Built a full-stack web app delivering personalised career recommendations via ML models integrated through REST APIs.
- Designed data ingestion and preprocessing pipelines; applied feature engineering and model evaluation for real-time predictions.
- Queried and aggregated user data using SQL to identify trends and improve recommendation accuracy.
- Created interactive result dashboards for data visualization, improving decision-support for end users.

Brain Tumor Detection System Python · TensorFlow/Keras · CNN · OpenCV · NumPy

- Built a CNN-based deep learning model to classify MRI images for tumor detection with high prediction accuracy.
- Designed end-to-end data preprocessing, augmentation, and model evaluation pipelines.
- Analysed model performance metrics (accuracy, precision, recall) and documented findings as analytical reports.

Online Shop Management System HTML, CSS, JavaScript, MySQL

- Developed a full-stack web application to manage products, inventory, and customer orders
- Implemented CRUD operations and dynamic UI using HTML, CSS, and JavaScript
- Designed relational database schema and ensured data validation and error handling
- Improved system usability through structured workflows and responsive design

E-Commerce Sales Analytics Dashboard Python · Pandas · SQL · Matplotlib · Seaborn · Power BI

- Performed end-to-end EDA on sales dataset — cleaned missing values, handled outliers, and standardised data.
 - Built SQL queries for customer segmentation, revenue trend analysis, and product performance reporting.
 - Created an interactive Power BI dashboard visualising KPIs: monthly revenue, top-selling products, and regional sales.
 - Derived actionable business insights from data supporting data-driven inventory and sales decisions.
-

SKILLS

Languages: Python, JavaScript, Java, SQL, C#

Frontend & Backend: React.js, Node.js, HTML, CSS, Flask, REST APIs, Git, GitHub

Database: Mysql, MongoDB, PostgreSQL, Database Design

Cloud: AWS, Azure, GCP

Software Engineering: DSA, OOP, System Design, Design Patterns, SDLC, Agile

EDUCATION

MIT ADT University

2023 – Present

B.Tech in Computer Science Engineering

Pimpri Chinchwad Polytechnic, Pune

2020 – 2023

Diploma in Information Technology

CERTIFICATIONS

- Full Stack Web Development (self learning projects & practice)
- Python for Data Science & Machine Learning – Udemy
- MySQL for Data Analytics and Business Intelligence – Udemy
- Data Science – Udemy
